Sat, Sun, Hol: 11:00 – 18:00
Mon: closed

Eva Petrič: SOUNDeSCAPES - Lullaby for drones

In the installation ***Lullaby for Drones***, the author reflects if there is something consciously imperceptible? The author's purpose is to enable us "to hear the image and to see the sound". For this purpose, she will use photos from her series Lullaby in various versions and media, as well as sound entitled Lullaby for Drones (Drone Lullaby), which are intended to create sensations of seeing sound and hearing images in space. You can read more about the author and her work [here](#).
